Subject: Ramazzini Institute beginning 3 year study of glyphosate toxicity

Hi everyone:

Just in case you all don't know about this:

"Beginning in May this year, Italy's independent Ramazzini Institute in Bologna, Italy will begin preparing a long-term self-funded research study into the effects of glyphosate on rats and on modelling effects on the embryo of pregnant women."

<http://journal-neo.org/2016/04/15/dramatic-turn-in-brussels-glyphosate-battle/>

<http://www.gmwatch.org/news/latest-news/16803-italy-s-ramazzini-institute-to-probe-glyphosate-safety>

http://healthandenvironment.org/uploads/Belpoggi_Slides.pdf

http://healthandenvironment.org/partnership_calls/18423

I am not sure if the Ramazzini work is related to the "Factor GMO study" that includes glyphosate that was announced a couple of years ago but made it into the press today—but Fiorella Belpoggi (from the Ramazzini Institute) is associated with that effort too so I am assuming that they are one and the same.
